

OSTATI EXPERT

LAFARGE Technical partner of

Information about product:

OSTATI EXPERT CEM I 52,5 R - Portland cement Expert CEM I 52,5 R is rapid set and fast hardening Portland cement of 52,5 strength class

Product use:

- In production of high strength concrete for special projects
- For construction of prestressed reinforced concrete of high final strength
- For concrete produced at low temperature
- The concrete enables to reduce the formwork removal term, increase the formwork turnover when making piecework, reduce construction terms without quality loss

Product advantages:

- Decrease of cement consumption on 1 cum concrete mixture
- Ideal addition of other mineral mixtures directly on the construction site, for better use
